

---

Aim: To get the participants to identify and discuss local attitudes towards PTW

Time: 30 minutes - 20 minutes group work, 10 minute group discussion

Method: Small group work and facilitated discussion

Materials: Interactive discussion – attitudes towards PTW

Exercise:

Facilitator to split participants into 4 groups

Each group has the task to discuss the attitudes towards PTW road safety is in their community

- What are traditional attitudes towards powered two-wheelers in your community?
- Do these attitudes support a powered two-wheeler friendly road environment?
- If not, how can we change these attitudes?
- Do we need legislation on powered two-wheeler safety?
- What dangers are there for motorised two-wheelers on the highway network?
- What policies and programmes exist to promote road safety for motorised two-wheelers?
- Whether any sub groups of motorised two-wheelers are more at risk than others (young / inexperienced)?
- What dangers are there for motorised two-wheelers on the highway network?
- What policies and programmes exist to promote road safety for motorised two-wheelers?
- Whether any sub groups of motorised two-wheelers are more at risk than others (young / inexperienced)?
